

Check Us Out: :

Middleton TSA

About Us:

Technology Student Association (TSA) is a nationwide organization with over **250,000 members** that promotes competition within STEM career fields. TSA **enhances personal development, leadership, and career opportunities in science, technology, engineering, and math (STEM)**, whereby members join and integrate these concepts through intracurricular activities, competitions, and related programs.

Why Join:

In addition to STEM competitions, there are also innovative competitions such as photographic technology and video game design that enable members to be creative. Competitors can **work together or individually on a project(s)** for the district, state, and/or national conference. These conferences provide an opportunity for members to **explore new interests, make new friends, and practice the skills they are learning in school**. There are also many leadership and volunteering opportunities that you can gain through TSA. Hope to see you in our club this year!

Accomplishments:

- 1ST IN CAD ENGINEERING AT NATIONALS (2019)
- 2ND IN SCIVIS AT NATIONALS (2019)
